**CATALOGUE OF PARTS AND
ASSEMBLY UNITS**

The Catalogue has been compiled by Engineer of the Department for Designing and Experimental Works 1 *E. N. Bogdanovich*. The initial data were provided by the leading specialists of the Chief Specialized Design Department of the Minsk Tractor Works (MTZ) Republican Unitary Enterprise.

Editor-in-chief: Chief Designer of the MTZ Production Group – Director of the Scientific and Technical Centre of the MTZ Republican Unitary Enterprise *I.N. Uss*.

Editor in charge: Chief Designer for Tractor Production: *A.G.Stasilevich*

Responsible for the issue: Chief of the Design Department for Maintenance Documentation *O.N.Natalevich*

The MTZ Republican Unitary Enterprise carries out continual work for improving the products being manufactured and reserves the right of modification of the design and specifications without notifying preliminarily the customers.

Some designations, names and illustrations may differ from those appearing on your tractor. For detailed information, please, contact your dealer and use the information bulletins being issued by the MTZ Production Group and distributed to the customers on a regular basis.

Assembly Units and Parts	12

INTRODUCTION

The present Catalogue contains the complete spectrum of assembly units and parts of Belarus 900/900.2/900.3/920/920.2/920.3/950/950.2/950.3/952/ 952.2/952.3 tractors. The Catalogue is intended for organizations and firms carrying out the sales, operation and repair of the tractors; it may be used for calculating and drawing up the applications for spare parts and as a reference book for disassembling and reassembling a tractor.

Any modifications related to the improvement of the design of the tractors are reflected in appropriate data sheets.

HOW TO USE THE CATALOGUE

The Catalogue includes the assembly units and parts of the tractor:

The assembly units and parts are divided into groups and subgroups according to the functional sign. This section is well illustrated with exploded axonometric images of component parts of the tractor. All the parts on the figures are provided with position numbers. To make the use of the catalogue more convenient when searching the required part, the same position numbers are given in the column "Position Nos." in the textual part of the Catalogue in the increasing order top-down. Being thoroughly elaborated in the artistic aspect, the figures provided in the catalogue allow the user to get familiar with the design of the parts and subassemblies and their configuration as well as can be a reference for carrying out the dismantling and re-mounting operations.

For example, the Catalogue contains the following entry:

"...240-1004100-A 4 Connecting rod (13, 20, 21, 37-39)".

It means that the assembly unit named "connecting rod" in the quantity of four units per engine consists of the following parts: bush (pos. 21), connecting rod (pos. 20), connecting rod bolt (pos. 13), connecting rod cap (pos. 39), washer (pos. 38) and nut (pos. 37). The column "Quantity" specifies the number of assembly units and parts used in this subgroup (1004) per tractor.

For the tractors, the traditional seven-digit system of designation of assembly units and parts (to the right from the prefix) is adopted.

The suffices A1, A2, A3 after the seven-digit number of the part mean that the design of these parts or assembly units has been modified, but remains **interchangeable** with the previously released design. The suffices Б, Б1, Б2, В, Г, Д, etc. mean that the new designs of the parts **will not be interchangeable** with the parts of the previously released designs, but **mutually interchangeable** within the same symbol.

The digital suffices after the number of the part or assembly unit, for example, 01, 02, 03, etc. characterize the design of the part or assembly unit (either embodiment or climatic solution) and these parts are **not interchangeable**.

For example, the parts "240-1104300-01 (shell of the 1st cylinder)" and "240-1104300-02 (shell of the 2nd cylinder)" have different embodiment and **are not interchangeable**.

Some parts adapted from the tractors of previous models have alphanumerical numbers. For example, "Д18-055-А-01 Seal ring".

PURPOSE

The BELARUS-900/900.2/900.3/920/920.2/920.3/950/950.2/950.3/952/952.2/952.3 wheeled universal tilling tractors belong to drawbar category 1.4 and are designed to perform a wide range of agricultural works: from soil preparation for sowing to harvesting and transporting operations; they can be used in forestry, municipal servicing, construction and industry.

BELARUS-900 (4x2) with the Д-243 diesel engine (59.6 kW/2200 rpm) and synchronized gearbox;

BELARUS-900.2 (4x2) with the Д-243 diesel engine (59.6 kW/2200 rpm), synchronized gearbox and updated design;

BELARUS-900.3 (4x2) with the Д-243.43 S2 diesel engine (62 kW/1800 rpm), synchronized gearbox and updated design;

BELARUS-920 (4x4) with the Д-243 diesel engine (59.6 kW/2200 rpm), synchronized gearbox and FDA (72-);

BELARUS-920.2 (4x4) with the Д-243 diesel engine (59.6 kW/2200 rpm), synchronized gearbox, FDA (822-) and updated design; BELARUS-920.3 (4x4) with the Д-245.43 S2 diesel engine (62 kW/1800 rpm), synchronized gearbox, FDA (822-) and updated design;

BELARUS-950 (4x2) with the Д-245.5 diesel engine (65 kW/1800 rpm), synchronized gearbox;

BELARUS-950.2 (4x2) with the Д-245.5 diesel engine (65 kW/1800 rpm), synchronized gearbox and updated design;

BELARUS-950.3 (4x2) with the Д-245.5 S2 diesel engine (65 kW/1800 rpm), synchronized gearbox and updated design;

BELARUS-952 (4x4) with the Д-245.5 diesel engine (65 kW/1800 rpm), synchronized gearbox and FDA (72-);

BELARUS-952.2 (4x4) with the Д-245.5 diesel engine (65 kW/1800 rpm), synchronized gearbox, FDA (822-) and updated design;

BELARUS-952.3 (4x4) with the Д-245.5 S2 diesel engine (70 kW/1800 rpm), synchronized gearbox, FDA (822-) and updated design.

The index ".2" means upgrading of the respective model by installing one or several units of higher engineering level:

- Front driving axle with planetary reduction gears (for 4x4 tractors);
- Hydraulic lift-based hook-up;
- Bonnet, roof, cab fender of updated design.

The index ".3" means the equipment of the tractors with diesel engines with index S2 certified in accordance with the 2nd stage of the ecological regulation of Directive 2000/25/EC, hydrostatic power steering (HPS) system with an independent oil tank, as well as the bonnet, roof and cab fenders of an updated design.

The distinctive features of the tractors presented in the Manual:

- Transmission with the synchronized gearbox (7/2) and synchronized reduction gear (step-up gear): 14 forward and 4 reverse gears.
- Hydrostatic power steering (HPS) with the Danfoss metering pump, cylinder in steering trapezium and steering tie rod.
- Unified rear driving axle with more convenient external readjustment of planetary gear brake bands.

- Hydraulic system with a power regulator completely controlling the rear attachment cylinder. Three sections of the distributor ensure the control of external cylinders of machines and tools.

- Safe comfortable cab complies with the requirements of the EC and OECD directives and is featured by the improved interior, heating and ventilation system.

Note:

The availability of equipment of a BELARUS tractor with this gearbox (GB) for each model of the series is marked with shaded highlighting.

The variant of equipment of a tractor with a particular gearbox is determined defined by the GB version marking made on a pad in the left top corner of the GB casing window as seen in the direction of the tractor motion by the impact method.
